Education

Shri Vishnu Engineering College for Women, Bhimavaram, Andhra Pradesh Aug 2023 – Jul 2027
B.Tech in Computer Science and Engineering (AI & ML) | CGPA: 8.36

Experience

Full Stack Development Intern May 2026 – Jul 2026
SkillDzire/ JNTU Kakinada

- Contributed to full-stack web application development involving frontend implementation, application workflows, backend integration, debugging, and Git-based version control.
- Worked across development and testing tasks to improve application functionality, identify issues, and support iterative software development.

Technical Skills

Programming: Python, C, Java **Data & Analytics:** SQL, Power BI, Excel, Pandas, NumPy, Matplotlib
Machine Learning: Scikit-learn, Classification, Regression, Supervised Learning, Data Preprocessing
Web & Backend: HTML, CSS, JavaScript, React, FastAPI, REST APIs **Databases:** PostgreSQL, SQLite
Testing & Tools: Selenium WebDriver, , Git, GitHub, Linux, Jupyter Notebook, Streamlit, VS Code

Projects

SmartHealth AI — Health & Wellness Intelligence Platform *Python, Scikit-learn, Pandas, SQLite, Streamlit*

- Built a multi-page health and wellness platform combining machine learning-based symptom pattern analysis, nutrition intelligence, diet planning, and personalized wellness insights.
- Implemented probability-based condition pattern analysis, allergy and diet filtering, wellness knowledge retrieval, history tracking, and progress monitoring using Python, Scikit-learn, Pandas, and SQLite.
- Developed and deployed the application with Streamlit and maintained the project using GitHub version control. [Live Demo] [GitHub]

SecureChange AI — Security Boundary Regression Analysis Platform *Python, FastAPI, RAG, Cybersecurity*

- Built a security analysis platform that evaluates application changes and identifies potentially affected security boundaries, controls, and regression risks.
- Developed a modular FastAPI backend with security-analysis and knowledge-retrieval components for structured findings and contextual explanations.
- Integrated security knowledge retrieval to connect application-change analysis with relevant security guidance and controls.

ShopEase — E-Commerce Test Automation Framework *Java, Selenium WebDriver, TestNG, Maven*

- Built a browser automation framework that executes e-commerce workflows including login, product selection, cart operations, and checkout.
- Implemented reusable TestNG test cases, assertions, browser interactions, and Maven project structure for automated functional validation.
- Configured automated tests to interact with the deployed ShopEase application through browser actions without manual user interaction. [Live Demo]

Relevant Coursework

Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning, Artificial Intelligence
